kurzweil 3000 updates:
## august 2019

V16.14 (Windows) and V16.0.14 (Macintosh)

Black background color option in text and column notes documents in Kurzweil 3000 for Web Browsers (www.Kurzweil3000.com)

In a text document
- **Document Options menu**
- Choose Black in the **Background Color dropdown.**
  This will automatically change the text color to white.

Changing the background color to black automatically changes the text color to white in text files and column notes.

The background color of an image file will not change to black.

In an image document, Black is an option in the **Document View menu**, but will *not change the image background*.
It will however, change the background of any column notes.

Changing the background color is for viewing the text or column notes document in www.Kurzweil3000.com.
It will not change how the document prints or is viewed in Kurzweil 3000 for Windows or Mac.
