

KURZWEIL 3000™ VERSION 12 for WINDOWS® WEB LICENSE

Anytime, anywhere learning

by Kurzweil Educational Systems®

Grade 3 - Adult

Kurzweil 3000 V12 Web License

Kurzweil 3000™ is an integrated reading, writing, and study skills software that enables students with learning disabilities and students who have the cognitive ability but not the reading ability to learn from same grade-level content as their peers.

Kurzweil 3000 Version 12 for Windows Web License allows schools to assign student tasks and view the results of student efforts; all without the need to host files locally.

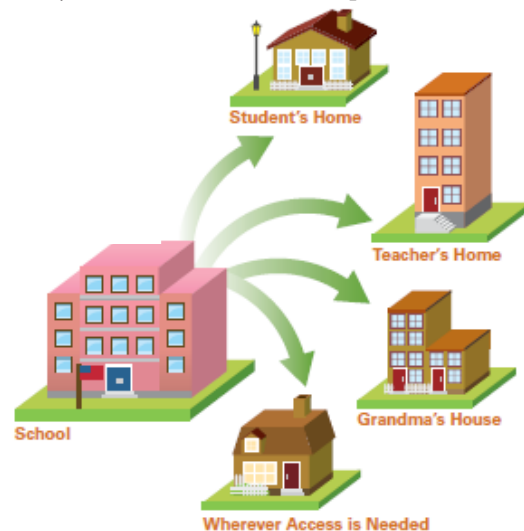

Kurzweil 3000 Version 12 Web License adds cloud-based file storage, task assignment, scoring and reporting services to the full set of tools already included in all versions of Kurzweil 3000. These new services give teachers the ability to assign reading, writing, study skill, or other academic tasks to students enrolled in their classes.

Leveraging the flexibility of the Internet, students can now log in to Kurzweil 3000 from any computer where the program is installed, work within their own customized user interface, and complete school work at their convenience. Completed coursework containing true/false, multiple-choice, or matching questions can now be scored automatically and reports for individual assignments and general use can be generated, thus ensuring student progress and a solid return on your investment.

Kurzweil Version 12 contains many new features and enhancements such as an increased focus on eContent accessibility, language learning support, and process writing development. Users of the Web License Edition can now pursue academic success anywhere and anytime!

Benefits for students, teachers and specialists

- Web-based file storage provides accessibility to media wherever, whenever needed.
- Unique accounts maintain personal preferences for each user.
- Ability to assign coursework and track progress towards completion.
- Score reporting for the most common question types.
- Full set of Kurzweil 3000 literacy tools available from any Internet connected computer.

Benefits for schools, districts and IT administrators

- “Cloud-based Storage” eliminates the need for server storage space and makes files universally available.
- Organized means of receiving and submitting assignments.
- Supports ALL learners from low to high performing.
- Meets the myriad needs of students from any service location.
- Usage statistics provide data to help assess return on investment.
- Provides ability to address Individual Educational Plan (IEP) goals and benchmarks across schools.
- Addresses all tiers of Response to Intervention (RtI).

Teaching and learning happens anytime, anyplace

Kurzweil 3000 Version 12 for Windows Web License Edition was developed to address the challenges of administering coursework, monitoring individual student progress, and storing and sharing files. These issues are directly addressed with the addition of several new Web technology solutions..

VPORT License and User Management

- VPORT® is a URL-based license delivery and management service developed by our sister company, Voyager.
- Manage district, schools, classes, teachers, and students.
- Roaming User Profiles allow individual preferences to travel wherever a learner logs in to a Kurzweil 3000 Web License client.

Web-based Universal Library Service

- Makes files available anywhere Kurzweil 3000 Web Client and an Internet connection exist.
- Share, reuse, and distribute documents and curriculum across users, schools, districts, and beyond.
- Serves as the repository for assignments.

Assignment Services

- Organized means of assigning and receiving student work.
- Assign reading, writing, and comprehension activities.
- Scoring of true/false, multiple choice, and matching questions.
- Follow progress and communicate based on individual needs.

Reporting Services

- Generate assignment score and usage reports to meet IEP objectives.
- Use score and usage reports to drive decision making towards goals for Adequate Yearly Progress (AYP).
- Ability to track usage at all levels (student, teacher, class, school, and district/campus).

For the Student Anytime, anywhere learning

Web Address System
Second, the Web has its own address system. The Web has millions of **links**. Finding one Web site could become a cyberspace nightmare! But the Web solves that problem. At home, your address might be 1111 Main Street. On the Web, you can have an address. Your Web address could be: **roberto.en.utexas.edu**. Who is Roberto? That's the person at the Web address. The **.en** means English Department. The end, **.edu**, stands for education. There are other endings. The ending **.com** means **commercial business**. **.gov** means government. **.au** means Australia. **.as** means Asia. Look at your school's Web address: can you explain how its address identifies the school?
