About Cambium Learning®

Cambium Learning is the leading education company focused exclusively on serving the needs of at-risk and special student populations. Cambium Learning companies specialize in providing research- and evidence-based instructional materials, services, and technology that address the needs of *all* students.

Cambium Learning® Technologies

Cambium Learning Technologies includes IntelliTools® and Kurzweil Educational Systems®, two long-time leaders in educational technology for the K – 12 classroom. We believe that all children can learn, and feel privileged to create products for the full spectrum of struggling learners: from those with significant mental and physical challenges to those who just need a little extra help.

Research and Efficacy

All of our product development efforts are guided by the latest pedagogical research and in many cases the research experts themselves. We also continuously pursue opportunities to assess and demonstrate the effectiveness of our products in real classroom situations. Here are two recent examples:

Federal Research and Evaluation Grant for Classroom Suite by IntelliTools®

We are excited to be completing the classroom study phase of our multi-year math grant from the National Institute of Child Health and Human Development under a Small Business Innovations Research Grant*. This funding has enabled us to work with expert math consultants and with researchers from the University of Oregon: Scott Baker, PhD, and Ben Clarke, PhD. We believe that the resulting product is both innovative and unique, and look forward to sharing the results of this extensive, scientific study.

* Grant Number NICHD/SBIR 2 R44HD046320

Recently Released Longitudinal Study of Kurzweil 3000™

In April 2008, the Iowa Department of Education released the Iowa Text Reader Longitudinal Study that documented results showing that students accessed information twice as fast and performed significantly better on passage comprehension measures when using *Kurzweil 3000*.

To find out more about the Iowa Study or other research validating the effectiveness of *Kurzweil 3000*, please call Customer Service or visit our Web site.

Universal Design for Learning (UDL)

At Cambium Learning Technologies, we are dedicated to supporting the learning process of every student. We recognize that students learn in different ways, and that for many students, specific cognitive or physical challenges impede the learning process. We are proud to build on our legacy of leadership in the principles of Universal Design for Learning, by continuing to offer students multiple means of representation, expression, and engagement with our products.

Response to Intervention (RtI)

Whether as a new way to manage the education of struggling students, or simply as a component of good teaching, Cambium Learning Technologies encourages the educators we work with to monitor student success with our intervention products and to adapt instruction accordingly. An important component of this effort is an ability to efficiently track student results. Responding to this need, we have built more robust reporting capabilities into *Classroom Suite*, and are excited to be launching the Cambium Learning Assessment System.

Kurzweil 3000	3-Adult	✓	✓	✓	✓	✓	✓

- ✓ Sequence content to align with local curriculum
- ✓ Instruction and practice with audio support and physical access support

- ✓ Access to any content through read aloud support
- ✓ Approved assessment accommodation

- Software grades PreK-5
- Develops reading, writing, and math skills

Classroom Suite brings the power of direct instruction in a flexible tool environment to students in grades PreK through 5. *Classroom Suite* features:

- Direct instruction for all students and all tiers of intervention
- Over 50 curriculum templates aligned to state and national standards
- No authoring required: modify templates in minutes using simple wizards
- Formative assessment and data gathering tools available for easy student reporting

Systematic, explicit instruction in a flexible environment

Classroom Suite combines two educational paradigms: systematic, explicit instruction and a flexible creativity tool. Activities or lessons are based on carefully crafted, scientifically designed teaching strategies, and allow teachers control over specific learning objectives enabling individualized instruction for students or groups.

Universal Design for Learning

IntelliTools has been a leader in accessible, differentiated instruction for over 25 years. All activities in *Classroom Suite* are designed to meet the needs of students with physical, visual, and cognitive disabilities and provide access to curriculum.

The reading, writing, and math lessons, accessible through IntelliKeys and switches, provide struggling students:

- Multiple means of representation
- Multiple means of expression
- Multiple means of engagement

Federally funded math research

The development of *Classroom Suite* is funded in part by the National Institute for Child Health and Human Development under a Small Business Innovations Research Grant*. The purpose of the grant is to apply conceptual models and manipulatives to the development of mathematical automaticity for elementary students.

* Grant Number NICHHD/SBIR 2 R44HD046320

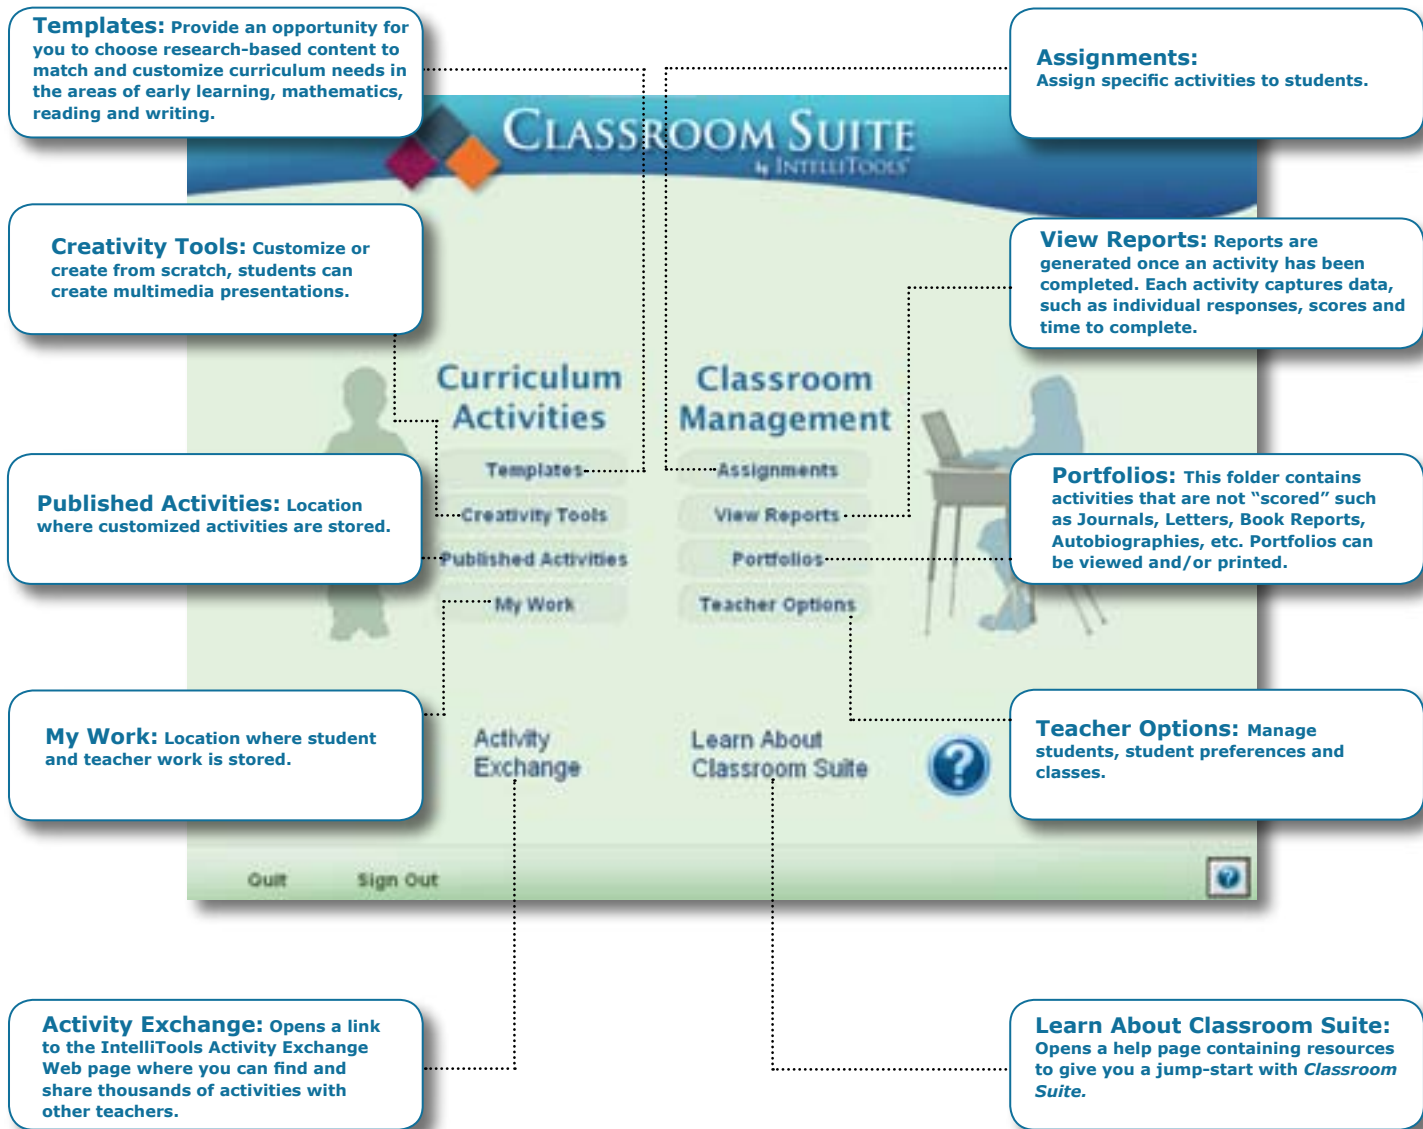

Classroom Suite is built on years of direct research performed by IntelliTools in conjunction with leading research teams. In all cases, the focus has been on students who are struggling to become proficient, including:

- Students with IEPs
- English Language Learners
- Students of low socio-economic status with lagging test scores

Addresses key areas of learning (see pages 6-9)

- 1. Early Learning**
- 2. Reading**
- 3. Writing**
- 4. Mathematics**

View Skills Overview Charts on page 10

1. Early Learning

Engaging early learning activities for emergent learners

These popular templates teach basic skills and have been updated to make them easier than ever to customize.

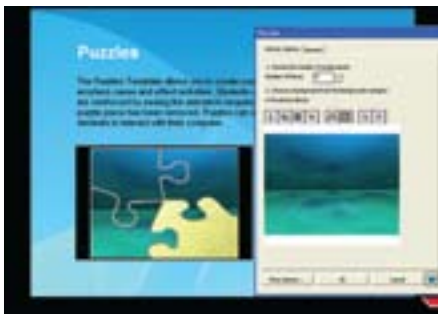

Teachers can create simple question and answer activities with their own curriculum content.

The Easy Explore template allows students to explore attributes of size (small, medium, large), number (1-20), color (12 different colors), and movements.

The Errorless Writing template allows teachers to create errorless writing activities with customized content based upon their curriculum or students' interest.

The Puzzles template provides the framework to quickly create puzzles with your own content. Teachers can create a puzzle using a graphic from the Classroom Suite 4 library, import a downloaded graphic from the Web, or import their own photos.

The Left Right template enables teachers to create activities that teach students how to use two switches to interact with an activity. This is a precursor to understanding the concept of two switch step scanning, where each switch has a different function.

IntelliKeys and IntelliSwitch

The *IntelliKeys* keyboard is the most commonly used alternative input device for students with disabilities (see page 14). *IntelliSwitch* is the wireless switch interface that operates instantly without configuration (see page 18). *Classroom Suite* is specially designed to create ease for the Speech Therapist, Special Educator, or Assistive Technology Specialist.

See page 13 for Alternative Access Kit.

2. Reading

Classroom Suite is anchored in the research by the National Reading Panel, the Florida Center for Reading Research, and research conducted with Karen Erickson, PhD, of the Center for Literacy and Disability Studies. *Classroom Suite* is an ideal tool for creating reading interventions based on *DIBELS® (Dynamic Indicators of Basic Early Literacy Skills)* screening data.

Model, Practice, Apply

Classroom Suite performs like an excellent instructor. Great teachers give direction (Model), support guided practices with their class (Practice), and then turn the reins over to their students (Apply). With *Classroom Suite*, students are led through three stages:

Show Me—The computer plays a video-like sequence to orient the student to the lesson.

Practice—The student practices and learns as the software provides strategic and corrective feedback.

Challenge—The educational objective is identical to “Practice,” but the corrective feedback is withdrawn and data is collected for reports.

If the student displays mastery in Challenge, he/she moves on to the next activity. If the student fails to master the assignment, he/she receives more practice with more strategic feedback.

The Match Sounds template allows you to create activities in which a student matches words based on their beginning, middle, ending sound, or rime. The words offered in this template are single syllable words with an initial, medial, and ending sound.

The Build Words Using Sounds template allows you to construct activities where students build words as they practice letter-sound correspondence. Students look at the picture, listen to the word, and use letter cards to build words. Choose words with three to six phonemes, with or without distracter letters.

The Build Fluency template allows you to create activities in which a student reads and records passages. You can create a fluency activity using your own text. Passages can be a single word, phrase, or sentence.

The Build Vocabulary template allows you to create activities to help build students' vocabulary. Create entries for key vocabulary words that include a definition, synonym, representative graphic, and sample sentence.

The Build Comprehension template allows you to create activities to help build student comprehension. Add a paragraph or passage. Enter comprehension questions about the passage. When students use the activity, they have an opportunity to preview the questions before reading the passage. This approach teaches students to think about what they are reading as they read.

These and many more curriculum templates are included.

3. Writing

Get your students writing with engaging activities

The scaffolded writing instruction integrated into *Classroom Suite* helps students to master the stages of the writing process (brainstorming, organizing, drafting, editing, publishing) and provides opportunities to learn to write in various genres. In the activities, students are asked to write to express, discover, record, develop, reflect on ideas, and problem solve. Students categorize ideas and organize them into paragraphs, then blend paragraphs within larger units of text.

The Autobiographies template allows you to write autobiographies in response to a series of structured prompts. These activities give students experience with the various elements that go into developing a well-thought-out, autobiographical narrative.

The Journals template allows you to develop sophisticated writing skills that include language comprehension, sentence structure, and writing independence. Three levels of Journals provide scaffolded support for developing writing skills and writing confidence.

The Reports template allows you to create a variety of reports that can be printed, handed in, and shown as a presentation for the class.

The Letters template allows you to build confidence and communication skills. The Letter activities include social letters, thank you letters, and business letters.

These and many more curriculum templates are included.

4. Mathematics

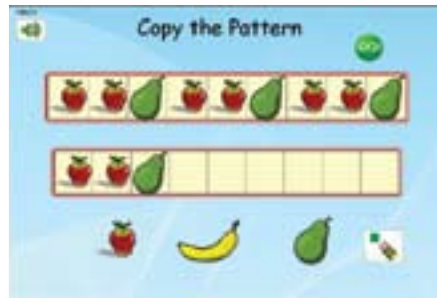

On-screen math manipulatives build core skills and master concepts

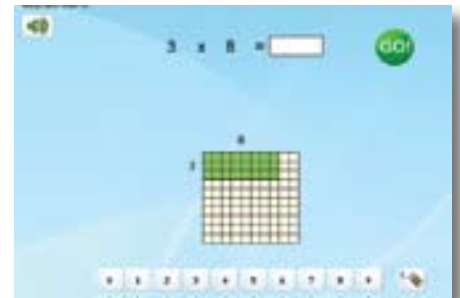

The mathematics interactions in *Classroom Suite* are based upon research in mathematical models and automaticity. Manipulative models and computational sequences reflect the latest research from the National Science Foundation, and the National Council of Teachers of Mathematics, and correspond to most popular mathematics curricula.

Skills Addressed

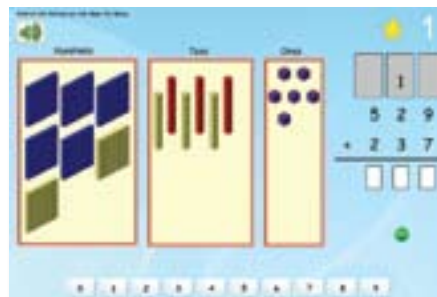

- Early Math Concepts
- Addition and Subtraction
- Multiplication and Division
- Place Value
- Fractions
- Decimals

The Patterns template allows you to create activities in which students build an understanding of patterns. The activities that can be created from this template include copying a pattern or finishing a pattern. The template uses these manipulatives: toys, shapes, and fruit.

The Multiplication Under 150 template allows you to create activities in which students learn fundamental multiplication concepts and solves basic multiplication problems. Students learn these concepts by using three manipulatives: arrays, ten frames, and number lines.

The Addition and Subtraction with Base Ten Blocks template allows you to create activities in which students use Base Ten blocks to understand conceptually the procedure of regrouping to solve multi-digit addition and subtraction problems.

The Equivalent Fractions template allows you to create activities in which the student learns about equivalent fractions and the concept of simplest terms. Manipulatives include fraction bars and parts of a set.

Closely Aligned to the National Mathematics Advisory Panel

Classroom Suite templates support key recommendations from the National Math Panel's Final Report (2008) including:

- A well-defined set of the most important topics should be emphasized in the early grades.
- Students should develop immediate recall of arithmetic facts to free the “working memory” for solving more complex problems.
- Students need to build conceptual understanding, computational and procedural fluency, and problem solving skills. These skills are equally important and mutually reinforce each other.
- Students need proficiency with whole numbers and fractions as foundations for success in algebra.

Skills Summary

Template		Skill Objective										
		Match Phonemes	Isolate Phonemes	Segment Phonemes	Blend Phonemes	Manipulate Phonemes	Letter-Sound Correspondence	Onset and Rime	High Frequency Words	Major and Minor Sounds	Syllable Patterns	Compound Words and Affixes
Phonemic Awareness	Sort Sounds											
	Match Sounds											
	Find the Sound											
	Count Sounds											
	Blend Sounds and Match											
Phonics	Change the Sound and Match											
	Remove the Sound and Match											
	Match Letters											
	Match Letter Sounds											
	Blend Onsets and Rimes											
	Build Words Using Sounds											
	Read High Frequency Words											
	Sort Major and Minor Sounds											
	Build Vowel-R Words											
	Sort Syllables											
Match Compound Words												
Blend Root and Affix												

Scaffolding Reading Skills - This flow chart gives examples of how you might scaffold the reading process using the templates that ship with Classroom Suite. The templates are designed around specific reading skills and are sequenced from simple to complex by the difficulty level of the skill.

Phonemic Awareness
 Match Phonemes → Isolate Phonemes → Segment Phonemes → Blend Phonemes → Manipulate Phonemes
 TOWARD INDEPENDENCE

Phonics
 Letter-Sound Correspondence → High Frequency Words → Major and Minor Sounds → Syllable Patterns → Compound Words and Affixes
 TOWARD INDEPENDENCE

Math Tools Assessments Learning Models All Templates

TOWARD INDEPENDENCE

Scaffolded Math Skills

Classroom Suite Gives Teachers the Data They Need to Track Student Progress

Classroom Suite provides highly-integrated features to help place students, track their progress, and report on status.

Assessment and automaticity templates

Assessment and Automaticity templates measure high-stakes mathematics and reading skills, enabling you to diagnose areas of weakness and pinpoint where intervention may be required.

- Determine baseline skill levels
- Adjust assessment speed and content
- Accessible for students with disabilities

Quick, user-friendly reporting for assignments and units

Each activity in Classroom Suite captures data and enables you to monitor the student's progress and to immediately determine where additional, direct instruction may be necessary.

- Details include percent score, number correct, time spent per question and overall, individual questions, and actual student responses
- Data gathering is ideal for teachers and curriculum coaches
- Easily import data into your Student Information System (SIS)

Custom unit building to sequence your own lessons

The Unit Builder allows you to link activities into a sequence for the purpose of building skills, managing student time, keeping unit lessons together, or for creating a series of scaffolded activities.

- Organize lessons around a theme or sequence of skills
- Decide if and when students can continue through the sequence of activities
- Track student progress with a class snapshot or detailed reports

Custom Units of Study to Match Your Curriculum

Classroom Suite provides the tools to develop targeted units of study. This can be easily accomplished in your district curriculum or technology office by an enthusiastic teacher, or through our Cambium Learning Technologies Implementation Services team. See page 36.

System Requirements and Pricing

Classroom Suite Network with Web Licensing

Easily manage licenses across an entire district using *Classroom Suite Network* with Web Licensing. Our hosted server will keep track of license usage, allowing you to install *Classroom Suite Network* anywhere in your district and on your students' home computers.

System requirements Standalone and Network Client

Windows®

Pentium II (300 MHz) Win 2000, XP (excludes XP 64-bit Edition), Vista; Win 2000 and Win XP – 128MB RAM; Win Vista—1GB RAM

Standalone: 1GB hard drive space;
Network Client: 220MB hard drive space;
16-bit high colors 1024x768

Note: For VoiceText speaking voices a minimum of 700MHz and 256 MB RAM is required.

Macintosh®

G3 333MHz OS 10.2 – 10.5; OS 10.2 and 10.4 – 128MB RAM; OS 10.5 – 256MB RAM; Standalone: 1GB hard drive space;
Network Client: 220MB hard drive space;
Thousands colors 1024x768

Overlay Maker 3 required to create *IntelliKeys* overlays

Network server

Windows®/PC

Pentium II 300MHz; Windows 2000/2003 Server; Novell 6.5 with NFA for Win & Mac clients; 256 MB RAM; 1GB hard drive space; Local Area Network minimum connection speed: 10 Mbps

Macintosh®

G3 333MHz; Mac OS X Server 10.2 – 10.5; 256 MB RAM; 1GB hard drive space; Local Area Network minimum connection speed: 10 Mbps

At Thornydale Elementary School in Tucson, AZ, students use *Classroom Suite* with an interactive whiteboard (in this example, for constructing sentences).

Classroom Suite Ordering Information

Achievement Through Access

Classroom Suite Alternative Access Kit

The Alternative Access Kit provides you tools to quickly get up and running with overlays and switch access to *Classroom Suite 4*. This kit includes:

- **Overlays** – 12 preprinted overlays are included with this kit. These overlays have been chosen to provide access to the key areas of *Classroom Suite* –Reading, Math, Writing, and Early Learning. Open an activity, place the overlay on the IntelliKeys, and your student is ready to go.
- **Overlay Directory** – An easy-to-follow overlay directory is included. It lists each overlay, the template it is attached to, and a graphic of the overlay.
- **Alternative Access QuickStart** – This guide provides detailed information on using overlays, IntelliKeys, switches, and IntelliSwitch with *Classroom Suite*.

Examples of Alternative Access Kit overlays for *Classroom Suite*

For some students the computer is more than just a helpful tool, it is their access to learning to read, write, and do math. For students with physical disabilities, it becomes their paper and pencil and the method they use to communicate their mastery of concepts. For students with cognitive disabilities it becomes their adapted learning environment presenting information in a format that maximizes learning.

Research in Universal Design for Learning (UDL) proves that students benefit from multiple means of engagement, representation, and expression. The combination of *Classroom Suite* and *IntelliKeys* (see page 14) or *IntelliSwitch* (page 18) provides unprecedented access to learning for students with special needs.

9CZ166473	Alternative Access Kit: includes 12 IntelliKeys Classroom Suite Overlays	\$24.95
9CZ166481	Access Bundle #5: includes IntelliKeys USB, Overlay Maker 3, Classroom Suite, and Alternative Access Kit	\$845.00

Access for All

IntelliKeys USB®

- Grades PreK–adult
- Access keyboard

For more information, visit
www.cambiumlearningtechnologies.com/itk

Open up the world of computer access for struggling learners

IntelliKeys USB® plugs into the computer’s USB port and provides access for anyone with physical, visual, or cognitive disabilities who has difficulty using a standard keyboard. In combination with its many overlays, it is the most flexible alternative keyboard available, providing individualized support for young students, struggling learners, and ELL students.

The keyboard with a changing face

IntelliKeys USB has no keys! Teachers simply slide overlays over its programmable surface to create keyboards for different students and curriculum areas.

The universal design of the overlays provides large, well-spaced “keys” in high-contrast colors to help students locate letters, numbers, words, and directional arrows. Concepts are broken down into manageable components with streamlined choices, fewer concepts at a time, pictures to support learning—even student photographs for personalization.

Standard overlays

The durable overlays included with *IntelliKeys USB* allow students to work with writing, math, and drawing programs; the Internet; and email:

- Alphabet overlay
- Basic writing overlay
- QWERTY overlay
- Web overlay
- Math access overlay
- Mouse access overlay
- Set-up overlay

Customized overlays

Overlay Maker 3 greatly expands the capabilities of the basic keyboard. It allows teachers to easily make overlays for any piece of software or group of learners. The customized overlays can be made in minutes and printed out on legal size paper. See pages 16-17.

Popular Software Overlays

Popular Software Overlays provides easy access to products from well-known companies such as Don Johnston™, Kurzweil Educational Systems®, Apple®, and Inspiration Software™. *Popular Software Overlays* are sold separately from *IntelliKeys USB®*. See page 19.

Customizable switch interface

IntelliKeys USB also works with switch-accessible software and helps the transition from switch-scanning to direct select access. It is compatible with cable and wireless *AbleNet* switches. *Overlay Maker 3* can be used to program words or phrases for switches connected to *IntelliKeys USB*.

System requirements

IntelliKeys USB works with Win 98, ME (32MB RAM) and Win 2000, XP (64MB RAM) computers with working USB ports; Vista (1 GB RAM); and Mac OS 8.6, 9.x, 10.1 or higher computers (4.5MB available RAM) with working USB ports (no ADB port). iMac 350 MHz or G3.

Personalized touch control

IntelliKeys USB's sophisticated programming allows teachers to customize each keyboard by selecting:

- How quickly each key responds to touch
- How quickly each key repeats (fast to slow)
- Whether the repeat feature is on or off
- How quickly the mouse moves
- Whether to latch the shift and control keys for one-finger typists
- Whether the student must lift off before another key press is recognized
- Smart typing, such as punctuation spacing and “q” automatically followed by “u”

IntelliKeys USB Ordering Information

9CZ139459	IntelliKeys USB (includes 1 USB cable)	\$395.00
9CZ138819	USB Cable	\$25.00
9CZ139651	Access Bundle #4: includes IntelliKeys USB and Overlay Maker 3	\$510.00
9CZ141823	Access Bundle #4 Five Pack	\$2,380.00
9CZ166481	Access Bundle #5: includes IntelliKeys USB, Overlay Maker 3, Classroom Suite, and Alternative Access Kit	\$845.00

If you are purchasing a new *IntelliKeys USB*, make sure your computer meets the minimum system requirements.

Volume pricing is available. Volume purchases cannot be combined with any other discount program or with Access Bundles. Please call for more information.

“The *IntelliKeys USB* keyboard coupled with programs like *Classroom Suite* brings learning to life and gives students with special needs the ability to manipulate their learning environment in ways that are not usually possible. ... [It] opens doors for students with special needs to achieve to their highest potential.”

—Brian Friedlander, Ph.D.,
Assistive Tek, LLC,
Port Murray, NJ

Providing Alternate Access Across the Curriculum

Open up the curriculum to all students

Overlay Maker® 3 transforms the *IntelliKeys* keyboard into a curriculum access device, opening up a world that was previously closed to many students with special physical or cognitive needs.

Create overlays for Classroom Suite activities

The similar look and feel of the two products and an easy Make Overlay Wizard allow you to quickly make overlays to access curriculum activities. Create keys that perform basic functions (such as inserting text or graphics) or complex functions (such as launching multimedia images).

Customize IntelliKeys for your students

Overlay Maker® 3 allows you to customize *IntelliKeys* to accommodate various range of motion and cognitive needs.

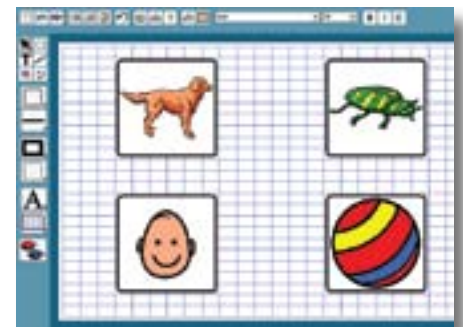

- Reduce input choices
- Group keys by color or location
- Add graphics to support comprehension
- Increase visual contrast by changing key size and color
- View keys as pictures, text, or both
- Motivate students to progress from switch scanning with switches to direct-select choices

Includes Scaffolded Activity Kits

Overlay Maker® 3 includes several *Classroom Suite* activities and tutorials featuring writing and math curriculum activities with overlays.

Simple, yet flexible

Easily create and modify overlays using the simple tools. Adjust key size, shape, and color; add images; and change the key content to type virtually anything. You can even program mouse keys and switch-scanning content.

 A Demo CD is available, call or go online today!

Supports Boardmaker™ 6 and DynaVox

Any installed Boardmaker 6 symbol libraries can now be directly accessed, so it is no longer necessary to have both applications open or to copy and paste.

Overlays can also be saved as DynaVox pages allowing DynaVox users to directly access *Classroom Suite* for curriculum.

Templates for off-computer activities

Based on work by Jo Meyer of SoftTouch, these off-computer activities help students learn important concepts. Templates include game boards, Lotto cards, and dominoes.

System requirements

IntelliKeys USB is required. Win 98 and ME 64MB RAM; Win 2000 and Win XP 128MB RAM; Vista (1GB RAM); 150MB hard drive space. Mac OS 8.6, 9.x, 10.1 or higher; 32 MB RAM; 150 MB hard drive space.

Overlay Maker 3 Ordering Information

9CZ143853	Overlay Maker 3	\$139.95
9CZ141111	Overlay Maker 3 Five Pack	\$560.00
9CZ139651	Access Bundle #4: includes IntelliKeys USB and Overlay Maker 3	\$510.00
9CZ141823	Access Bundle #4 Five Pack	\$2,380.00
9CZ139686	Access Bundle #5 includes IntelliKeys USB, Overlay Maker 3, Classroom Suite, and Alternative Access Kit	\$845.00

Please call for volume pricing information.

Three Easy Steps

1. Create and arrange keys in *Overlay Maker 3*.

2. Print the overlay on legal size paper.

3. Send the overlay content to *IntelliKeys* and then slide in the paper overlay.

Wireless Switch Access

IntelliSwitch™

K-Adult

Greater Mobility and Access

The *IntelliSwitch* is a wireless switch interface engineered by Madentec. Offering greater mobility and easy access to software, *IntelliSwitch* is compatible with both IntelliTools' software and Madentec's Discover products.

As easy to use as IntelliKeys

IntelliSwitch automatically recognizes the switch content of any overlay, including overlays for *Classroom Suite*, *Balanced Literacy*, *Number Concepts*, and *MathPad* titles.

Teachers simply install the driver software, plug a switch into one of *IntelliSwitch*'s five ports, and plug the receiver into the computer's USB port. Students can then access software with one or more switches—wirelessly! Two more built-in recessed switches make it easy to assist a student who is using the switch.

No cables mean greater mobility and convenience

With the wireless receiver mounted in the computer's USB port, students can use *IntelliSwitch* from over 20 feet away. The wireless interface allows switches to be easily passed from student to student. The receiver can also be mounted on a wheelchair for untethered mobility.

26 Preset Switch Settings

Choose one of the presets to allow immediate access to many popular switch-accessible titles.

Part of a Complete Switch Access Solution

When used with *Discover Pro* and *Discover Envoy* software, *IntelliSwitch* enables individuals with motor impairments to perform all keyboard and mouse functions by simply pressing a switch.

Features

- 5 switch ports; 2 built-in switches
- Switch connectors: 3.5mm mono jacks
- 26 available switch presets (via software)
- Uses 2 AA batteries when used wirelessly
- USB cable (supplied for non-wireless use)
- Works with *AbleNet* switches
- Compatible with *DiscoverPro* and *Discover Envoy* software

System requirements

IntelliSwitch works with Win 98, ME (32MB RAM), Win 2000, XP (64MB RAM) computers with USB ports, Vista (1GB RAM) and Mac OS 10.1 or higher Mac computers (4.5MB available RAM) with USB ports.

9CZ143386 IntelliSwitch \$299.00

Popular Software Overlays

K-Adult

With the iTunes overlay, special needs students can enjoy the same music as their peers.

More access for more students

These convenient overlays make your favorite programs easier to use—with streamlined choices, fewer or larger keys, and access to favorite features. Students or teachers simply place the overlay on the *IntelliKeys USB* keyboard and open the application.

Fourteen overlays provide seamless access to:

- AOL® Instant Messenger (AIM)
- iTunes® and Safari
- Co:Writer® and Write:Outloud®
- WYNN and TestTalker
- Kidspiration and Inspiration
- Kurzweil 3000™
- Microsoft® Word and PowerPoint

Customizable for easier access

Teachers can also customize the overlays as needed with *Overlay Maker 3*:

- Add or delete keys
- Add text or graphics to keys
- Group keys by color or location
- Increase visual contrast
- Reduce input choices

- Add graphics to support comprehension
- Motivate students to progress from scanning with switches to direct-select choices
- Assess range of motion and cognitive capabilities

System requirements

Popular Software Overlays for *IntelliKeys USB* works with Windows 98, ME, 2000, XP, Vista and Mac OS 10.1 or higher. The associated software must be installed on the computer.

IntelliKeys USB keyguards for standard and custom overlays

These keyguards from IntelliTools® are designed to help students who have difficulty selecting the correct keys.

Overlay Lock

For the times when students are not using a keyguard, this handy device clamps on to the top of the *IntelliKeys USB* and prevents students from pulling out overlays.

Additional Access Tools

Tracker® Pro from Madentec

The *Tracker Pro* is a computer input device that takes the place of a mouse for people with little or no hand movement. It plugs into a computer's USB port and can be mounted on to a monitor, laptop lid, or augmentative communication device using the mounting adaptations that are included.

A tiny reflective dot is then placed on the student's forehead or glasses. When the student sits at the computer facing the *Tracker Pro*, it shines out a beam of invisible infrared light, detects the reflection of the light off the dots when the student makes a head movement, and translates it into mouse movement.

Anything that can be done with a mouse can be done with the *Tracker Pro* in conjunction with *MagicCursor 2000* dwell-clicking software. *Tracker Pro* works with both Windows and Macintosh computers and most augmentative-communication devices with a USB port.

MagicCursor 2000 from Madentec

The *Tracker Pro* lets students point, and the *MagicCursor 2000* lets them click. *MagicCursor 2000* is a software replacement for the functions of the mouse buttons, providing access for students who can point but not click.

Students simply hover over the item they want to select, and after a preset amount of time, *MagicCursor 2000* automatically performs the click, double-click, or drag.

MagicCursor 2000 works with Windows 98, ME, NT, 2000, or XP, Vista, and Mac OS X.

Discover from Madentec

The *DiscoverPro 2* software (Windows) and *Discover Envoy* software (Mac OS X) allow students with motor impairments to control the computer through touch, scan, or point.

For "touch" access, *Discover* works with *IntelliKeys USB* as an alternative keyboard. All mouse and keyboard functions can be controlled, and applications can be launched, by pressing a single button.

For "scan" access, *Discover* can be used with *IntelliSwitch* to create a complete computer access solution for switch users. *Discover* software provides switch access to mainstream applications that do not have scanning functionality built in.

For "point" access, choose the on-screen keyboard option (*Discover OnScreen*) together with *Tracker Pro*.

AbleNet Switches

AbleNet's traditional switches and wireless *Jelly Beamer* are made of durable, high-impact plastic. They are responsive across the entire surface, and include flange base and provision for audible feedback. Traditional switches include a six-foot cord, and the Big Red includes a storage compartment in the base. Big Red Traditional Switches are 5" diameter; *Jelly Bean* Traditional Switches are 2.5" diameter.

System requirements

IntelliSwitch works with Win 98, ME (32MB RAM), Win 2000, XP (64MB RAM) computers with USB ports, Vista (1GB RAM) and Mac OS 10.1 or higher Mac computers (4.5MB available RAM) with USB ports.

DiscoverPro 2 (Windows): Win 2000 or Win XP, Vista (1GB RAM) 400 MB HD, 128MB Ram (256MB recommended).

Discover Envoy (Macintosh OSX): Macintosh computer with at least a 1GHz G4 processor running Mac OS X version 10.4.3 (Tiger) or higher. A minimum of 256MB of RAM (512MB recommended) and 100MB of free hard drive space.

ReadyMade® Story Kits

Grades K–2

ReadyMade Story Kits are thematic units based on stories or songs, each featuring up to 35 activities utilizing patterned language, familiar refrains, and engaging interactive animations.

- Each adventure begins with a printed storybook
- Includes answer checking so that teachers can assess progress
- Supported with an extensive resource PDF document full of printable games and away-from-the-computer activities

NOTE: A licensed *Classroom Suite* (Version 3.2 or higher) must be installed to run the *ReadyMade Story Kits*.

Colorful Caterpillar

Students are introduced to the concepts of color and number while following the metamorphic process of the caterpillar. Watch your students enjoy learning from the 35 supplemental activities teaching quantity recognition, simple addition and subtraction, symmetry and pattern, phonics, sentence building, and comprehension.

Five Cuddly Teddies

Students count backward as each of the five cuddly teddies goes its way until there are none. Within the engaging bear theme, students practice 35 supplemental activities and explore early math concepts, operations, position concepts, classification, reading, phonics, comprehension, and writing.

Animal Habitats

Early learners travel with the Curious Polar Bear to five habitats—jungle, grasslands, mountains, arctic, and desert—to learn about animals and their habitats. Thirty-five thematic activities provide student practice in comprehension, writing, phonics, classification, number concepts, math operations, patterns, and more.

For use with
Classroom Suite

System requirements

Each *Story Kit* requires approx. 150 MB of HD space. All *ReadyMade* products operate with *Classroom Suite* (Version 3.2 or higher) and have the same system requirements (see page 12).

Balanced Literacy Grades K-2

Nine units, built around animal themes with high-quality graphics and songs, engage students in a year-long interactive multimedia program that supports and supplements the language arts curriculum.

A balanced approach

Designed by experts in literacy and special education, *Balanced Literacy™* provides a sequential approach to early literacy instruction that integrates:

- Guided reading
- Supported writing
- Word study
- Phonics activities
- Multi-sensory reinforcement
- Extensive practice

Essential elements of reading instruction

- Phonemic awareness
- Phonics
- Decoding and encoding
- Fluency
- Vocabulary
- Comprehension

Writing activities included

The *Primary Writing 3* CD-ROM, from the IntelliTools *ReadyMade Curriculum Activities* line, provides guided writing activities that correspond to *Balanced Literacy's* nine topic areas. Structured phonics instruction, encoding (spelling) activities, and story writing games emphasize grammar and usage.

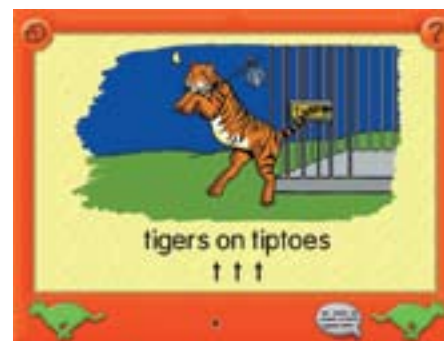

Support for success

- Balanced approach
- Theme-based Anchor Books
- Repetition and practice
- Auditory support
- Immediate assessment
- Student portfolios
- Correlated to standards
- Special needs support
- Teacher support

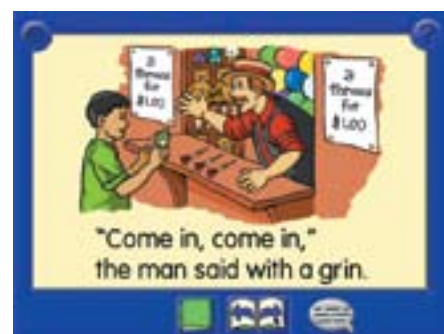

Research Demonstrates Significant Improvement

Balanced Literacy was developed under a grant from the National Institute of Child Health and Human Development, National Institutes of Health. It was tested with students around the country, with excellent results.

The research report can be found at www.intellitools.com.

Animated songs introduce each new word family.

Anchor Stories introduce patterned language, sight vocabulary, and word families.

More than 200 computer-based phonics activities develop decoding skills.

System Requirements

Pentium (333MHz); Win 98, and ME 64MB RAM; Win 2000, Win XP 128MB RAM; Vista (1GB RAM); 20MB (runs from CD) plus QuickTime Player hard drive space; 16-bit high colors 640x480; Sound Blaster 16 compatible. iMac/G3 (333MHz); Mac OS 9.2.x, 10.1.5 or higher; 32 MB available RAM; 20MB (runs from CD) plus QuickTime Player hard drive space; 1000 colors 640x480. Minimum 8x CD ROM.

Balanced Literacy ordering information

Number Concepts and MathPad

Counting to Computation

Grades K–8

Number Concepts 1 with Oshi the Otter™

Grades K–2

Students join Oshi and his seashore friends as they practice counting sea creatures at the beach, do beginning addition and subtraction at the tide pool, and help Mary the Moray Eel decide which set of creatures is greater in number than the other. Oshi can ask questions or students can make up their own problems.

System requirements

These programs are not Mac OS X compatible.

NC 1 and 2: Win 95, 98, ME 32MB RAM; Win 2000 64MB RAM; Win XP 128MB RAM; Mac OS 7.5-9.1; 17MB available RAM; NC 1: 7.5MB hard drive space; NC 2: 15MB hard drive space. NC 1 and NC 2 run from CD; 256 colors 640x480. Note: NC1 will not run on computers with 1 GB RAM.

MathPad: Win 95, 98, ME 32MB RAM; Win 2000, XP 64MB RAM; Vista (1 GB RAM); Mac OS 7.5-9.1; 2MB available RAM; 2MB hard drive space. 256 colors 640x480. For Macintosh, if switch interface is not IntelliKeys, *ClickIt!* is required.

MathPad Plus: Win 95, 98, ME 32MB RAM; Win 2000, XP 64MB RAM; Vista (1 GB RAM); Mac OS 7.5-9.1; 4MB available RAM; 10MB hard drive space. 256 colors 800x600.

Number Concepts 2 with Penn and Gwen™

Grades 3–5

Students travel to the land of ice and snow, where Penguin friends Penn and Gwen help them master skip counting, place value, and factoring. Students match wits against Flame the Fiery Menace. Realistic simulations help reinforce abstract concepts.

MathPad™

Grades K–2

MathPad is an electronic worksheet that allows students to do addition, subtraction, multiplication, and division directly on the computer. Students do their own calculations just as they would on a worksheet. *MathPad* is ideal for students who need help organizing or navigating through math problems or who have difficulty doing math worksheets with pencil and paper.

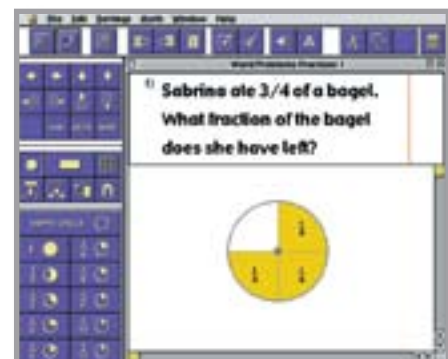

Correlated to National Council of Teachers of Mathematics (NCTM) Standards and selected state content standards.

MathPad™ Plus: Fractions and Decimals

Grades 3–8

MathPad Plus: Fractions and Decimals offers the same functionality as *MathPad* with exciting new features that allow students to do addition, subtraction, multiplication, and division using fractions and decimals. *MathPad Plus* is especially helpful for adapting problems from worksheets or textbooks so that students with learning disabilities can work on the same problems as their classmates.

Correlated to NCTM standards and selected state content standards.

Stages Assessment Software

- Software for all ages
- Assesses cognitive, access, reading, writing, math, and functional learning needs

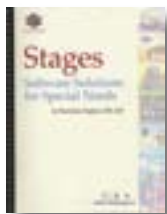

Stages Assessment

Stages helps you identify and assess your students' skills and abilities, select appropriate instructional software, and document each learner's gains. The *Stages* framework starts with pre-academic skills and continues on to reading, writing, math, and functional learning. Graphing and reporting functions allow you to measure your students' progress in a meaningful way.

Stages Software Solutions for Special Needs, Second Edition

Stages software provides all the tools you need to effectively assess the seven developmental stages of cognitive language development in special needs learners.

by Madalaine Pugliese

132 pp.

The book documents the *Stages* framework with powerful insights and practical examples. This book will help you find the best way to discover a learner's abilities.

It includes:

- An overview of the *Stages* framework and a detailed description of each Stage
- Competency goals and example IEP objectives
- Off-computer extension activities
- Extensive lists of recommended curriculum software titles

Aligned to Classroom Suite 4 templates!

Based on captured data, educators determine which curriculum areas are in need of skills practice. *Classroom Suite* templates are ideally suited to support these areas. Activities can be easily customized to support students and document their progress in all seven *Stages*, and provide robust accessibility options for switch and IntelliKeys users. The alignment grid is available in the *Stages* section of our Web site.

Stages Assessment software

Stages offers 300 easy-to-use and engaging activities at seven stages of cognitive and language development, from cause and effect to written expression. *Stages* 1-3 focus on language foundation, while *Stages* 4-7 focus on academic skills. Using its automatic data-gathering capabilities, and Observation Forms, you can:

- Assess learners' progress toward IEP goals and state standards
- Identify appropriate curriculum software to build skills
- Generate primary evidence for alternate assessment portfolios

Stages Math: Number Sense

Number sense is the basic building block for all math skills. To succeed in math, learners must be able to:

- Recognize and use numbers fluently
- Identify their relative values
- Count, compare, and sequence numbers
- Locate numbers on a number line
- Identify parts of a whole
- Recall basic math facts quickly

Areas covered:

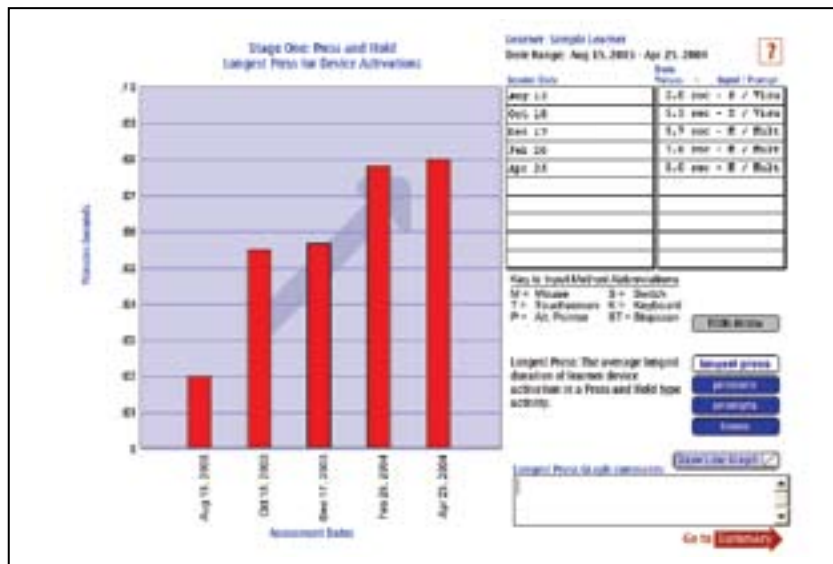

- Words for Numbers
- Count
- Compare
- Sequence
- Math Facts
- Money
- Number Line
- Fractions

Stages Report Wizard

Stages Report Wizard works with your saved Stages reports to show many aspects of a learner's achievement toward curriculum standards and IEP goals. It automatically generates graphs, analyzes reports for content mastery, and compiles the results into a final document for printing, saving, or distributing as a PDF file. With *Stages Report Wizard*, you can:

- Create assessment portfolios
- Report on progress and determine new objectives at IEP meetings
- Discuss a student's progress with parents
- Transition a student to a new educator
- Recommend curriculum software that meets student needs
- Design and implement long-term alternate assessment plans

System Requirements for Stages Assessment and Stages Report Wizard

Windows · 166 MHz Intel® Pentium processor or greater; Windows 95, 98, ME, NT4, 2000, XP; 32MB RAM; 800 x 600 resolution color monitor.

Macintosh · 120 MHz Power PC®; System 8.1 or later, including OS X; 32 MB RAM; 800 x 600 resolution color monitor.

Stages Math System Requirements

Windows · Intel® Pentium II processor or higher recommended; Windows® 98, ME, NT4, 2000, XP; 32MB or more of available RAM; 640 x 480 color monitor.

Macintosh · Power Macintosh® (G3 or higher recommended); System 8.6 or later, including OS X 10.x; 32MB or more of available RAM; 640 x 480 color monitor.

Kurzweil 3000™ Windows® Version 11 by Kurzweil EDUCATIONAL SYSTEMS®

- Software grades 3-Adult
- Built on text-to-speech conversion
- Reading, study skill, and writing support

Kurzweil 3000 reads text aloud from numerous sources using state-of-the-art voice technology and patented dual highlighting of the content being read.

A Demo CD is available, call or go online today!

Kurzweil 3000 supports the student and the teacher

1. Reading support
2. Comprehension and study skills
3. The writing process
4. Instructional assessment

1. Reading Support

Kurzweil 3000 provides multi-sensory access to virtually any text or curriculum, including print, electronic, and Web-based documents. This access allows users to engage in the study of cognitive and age-appropriate materials.

As both a Universal Design for Learning (UDL) and Response to Intervention (RTI) tool, research has shown *Kurzweil 3000* to be highly effective in addressing the development of three critical reading skills:

Fluency – *Kurzweil 3000* reads text aloud at a rate appropriate for each user, providing a model of and support for fluent decoding of text.

Vocabulary – By fluently reading text aloud, *Kurzweil 3000* not only increases student reading speed, it provides exposure to grade appropriate vocabulary and immediate support in the form of dictionary and reference tools.

Comprehension – Compensating for weak decoding skills, *Kurzweil 3000* allows the user to focus on the meaning of content, offering highlighters and other tools to enhance understanding of material.

Existing *Kurzweil 3000* customers can upgrade to Version 11 at a discount.

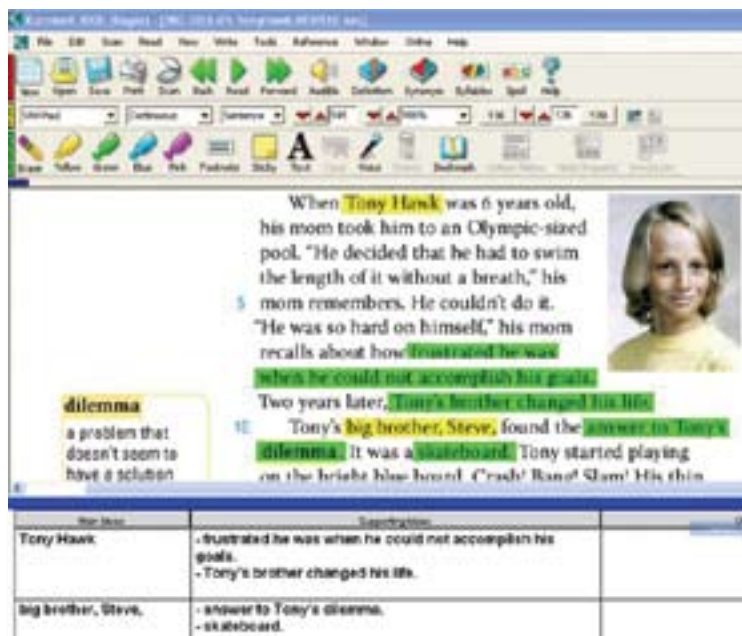

Please call for more information.

For more information, visit
www.cambiumlearningtechnologies.com/k3w

2. Comprehension and Study Skills

Access to content is just the beginning, as *Kurzweil 3000* study skills tools enable educators to teach and reinforce research-based strategies including: SQ3R, Cornell Notes, and others that will assist students throughout their entire lives.

Kurzweil 3000 allows students to highlight key points while reading and extract directly into neatly organized column notes format.

Tools overview:

Highlighters – *Kurzweil 3000* allows teachers to use up to six highlighters to identify and classify important information.

Sticky Notes – All the flexibility of Post-it® notes, with the added benefits of being read aloud and typewritten.

Voice Notes – Uniquely designed to allow for the recording of important related information, additional facts, reminders, or instructions.

MP3 Audio File Creation – Conversion of reading material into portable audio files is simple. NEW! *Kurzweil 3000* allows direct integration to your iTunes library.

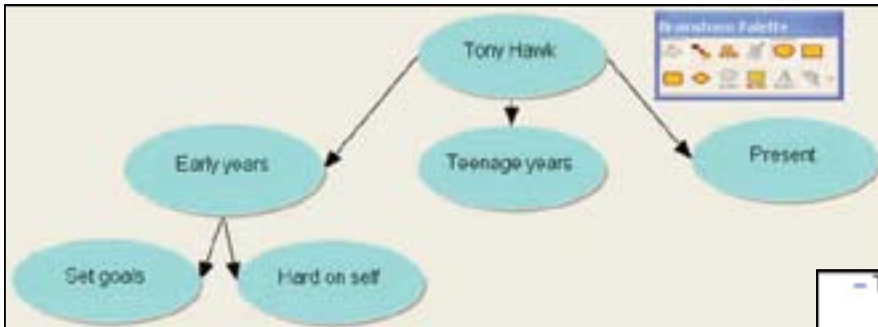

Dictionaries – *Kurzweil 3000* includes ten dictionaries including translations to Spanish, French, German, and Italian. Picture Dictionary support is also available.

Online Reference – Merriam-Webster's Medical Dictionary, Columbia Encyclopedia, and Wikipedia are just a click away.

Kurzweil 3000 toolbars are completely customizable, allowing for optimized instructional environments.

3. Writing Process

The Brainstorm feature in Kurzweil 3000 allows students to quickly get thoughts out, rearrange them, and view them either as a graphic organizer or an outline.

Kurzweil 3000 has numerous research-based writing tools to support the student at every stage of the writing process—from brainstorming ideas with the graphic organizer to gathering information using the integrated Column Notes feature to reviewing and publishing.

Writing features:

Brainstorm – Jump start the writing process by getting thoughts recorded and visually organized.

Templates – Guide students in many standard writing formats, such as cause-effect and compare-contrast. Teachers can edit or create new templates.

Outline – Create hierarchical views of information and ideas.

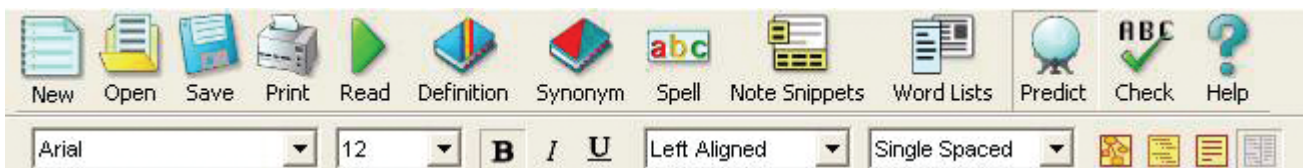

Word Lists – Activate to encourage use of key transition words, strong verbs, or teacher defined terms.

Column Notes – Two and three column options available; can be used with highlighters to automate.

Draft – Speak while typing, thesaurus, and word prediction functions are available to assist; view full or split screen with outline.

Review – Finalize written material using a customizable list to encourage proofreading and other editing tasks.

Publish – Save files in popular formats such as DOC, RTF, or TXT for easy printing and sharing.

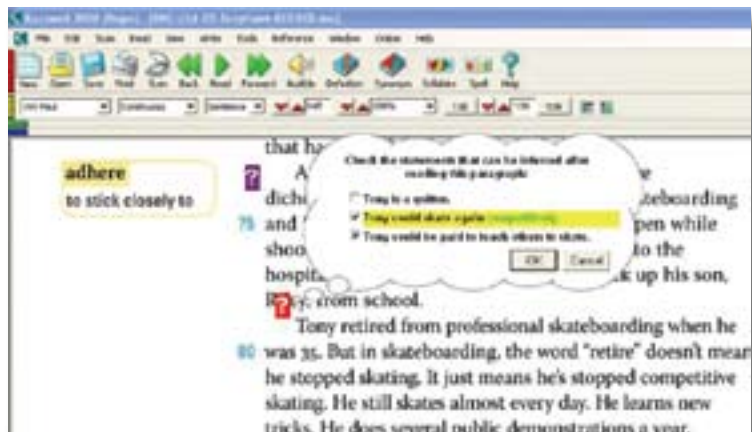

The combination of text-to-speech, word processing capabilities, a dictionary and thesaurus, and other features enhance students' written output.

4. Instructional Assessment

From classroom worksheets to weekly quizzes to state-level assessments, *Kurzweil 3000* can provide tools to accommodate a student's Individualized Education Program (IEP), provide a teacher's formative decision-making data, or facilitate a test administrator's need for security.

Create Bubble Notes to offer useful instructional support for specific reading strategies and to actively assess student comprehension during the reading process. Available options include: instructional prompts, true/false, multiple choice, matching, and short or extended response.

A Demo CD is available, call or go online today!

Assessment functions:

Read Aloud – *Kurzweil 3000* can replace the need for proctors to read tests for students.

Fill-in-the-Blanks – Using *Kurzweil 3000* Text Notes, students can complete and print any assignment neatly.

Circle Text – Choosing a correct answer or marking subject and predicate is easy with two circling options.

Lock Features – Spell checking, dictionaries, online reference, and Read the Web are among features that can be disabled during tests.

File Properties – Disallow printing and copying of sensitive test documents.

Record Responses – Voice Notes allow students to provide responses orally for teacher review.

***Kurzweil 3000* is an approved testing accommodation in many states.**

Visit the "Research and Resources" page in the Kurzweil section of our Web site.

Kurzweil 3000™ Windows® Version 11 by Kurzweil EDUCATIONAL SYSTEMS®

Color Professional – Full featured product that includes additional content acquisition functions for converting print or digital content to accessible format in *full color*. Typically used by teachers and educators for content preparation and sharing.

Black & White Professional – Full featured product that includes additional content acquisition functions for converting print or digital content to accessible format in *black and white only*. Typically used by teachers and educators for content preparation and sharing.

LearnStation™ – Full featured product that is used to read readily accessible material and additional content created using *Kurzweil 3000 Professional* software. Typically used by students for reading support and completion of comprehension tasks, study skills, and process writing assignments.

Kurzweil 3000 install options:

Standalone – Ideal for single users.

Network – Best for building-wide usage. Install anywhere within the network and use up to the purchased number of licenses concurrently. Includes usage tracking.

NEW! Web License – Excellent for district-wide or other large geographic area usage, including at home. Install anywhere and use up to the purchased number of licenses concurrently. Includes usage tracking. Requires Web access.

Kurzweil 3000™ USB for Windows® – Version 11

by Kurzweil EDUCATIONAL SYSTEMS®

Take Kurzweil 3000 with you...

All the power of *Kurzweil 3000* is now mobile. Teachers and students can now work on any Windows computer – with no software installation required!

Primary benefits:

- **USB Flash Drive**—Portable and convenient, containing *Kurzweil 3000* for Windows and 2.6 GB of available storage.
- **No Installation**—Access to reading, writing, and study skills tools is available without the need for IT staff involvement to install and maintain software.
- **Version 11 Features**—Includes powerful new process writing tools, Spanish voices, and upgraded Optical Character Recognition.
- **Virtual Print** (Professional ONLY)—The ability to create new documents without scanning is now available.
- **Work wherever, whenever**—Ideally suited to the student on the go from classroom to library to home and beyond.
- **Support for Windows**—Includes Windows 2000, XP, and Vista™.

System requirements

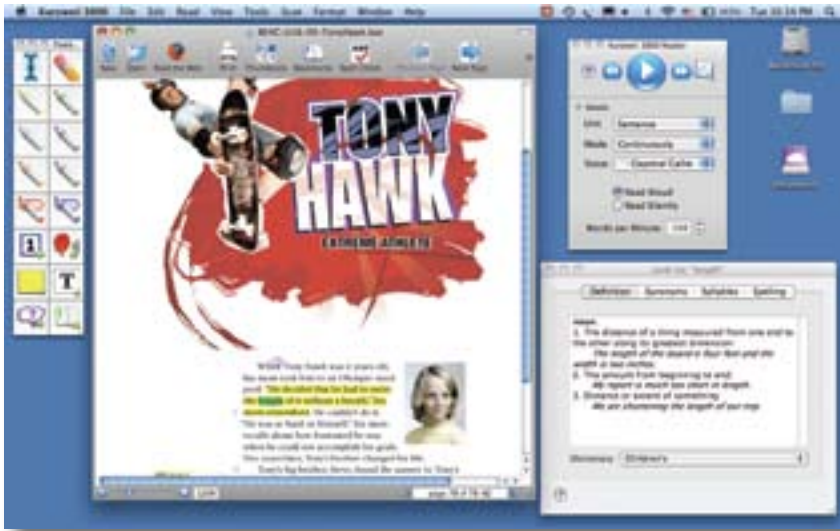

Processor: 700+ MHz Intel Pentium III.
 Operating Systems: Win 2000, XP, Vista.
 Memory: Min 512MB (1GB for Vista 64-bit).
 Disk Space: 200MB. Screen Resolution: 16 bit high colors, 800x600. USB 2.0 port. Scanner: (Professional only) TWAIN Compliant. For How-to-Videos: Windows Media Player. Sound card: Creative Labs Sound Blaster 16 or other; 16-bit compatible sound card with speakers and microphone; keyboard and mouse.

Kurzweil 3000™ Version 4 for Macintosh® by Kurzweil EDUCATIONAL SYSTEMS®

For more information, visit
www.cambiumlearningtechnologies.com/k3m

With a strong set of reading, writing, and study skills tools, *Kurzweil 3000 for Macintosh Version 4* has many features to help students work more effectively and independently. Here are a few of those unique features:

- **High Quality Text-to-Speech Voices**—More natural sounding and understandable voices from Cepstral® make reading easier.
- **Create Audio Files**—The conversion of reading material or notes to audio files is completely integrated with iTunes® for easy transfer directly to iPod®.
- **Read the Web using Mozilla Firefox**—Allows users to explore the world of Internet based content with the reading features of *Kurzweil 3000*.
- **Instructional Support with Bubble Notes**—Teachers can embed questions and instructional support directly into reading assignments, helping students stay on task and enhance comprehension. Easily extractable, Bubble Notes can also be used by students to quickly and easily create study guides.
- **Universal Binary Support**—Provides maximum performance on Macintosh with Power PC or Intel-based processors, *Kurzweil 3000* runs at the highest levels.

System Requirements

G3 or higher (Power PC or Intel® Core™ 2 Duo processor); OS version Mac® OS X version 10.3.9 or higher (10.4 or higher for Create Audio File feature); Professional version; Memory: 256 MB; Hard Disk Space: 200MB (if using Cepstral voices: Memory 512 MB; Hard Disk Space: 500MB); Display: 800 x 600 screen; CD-ROM Drive: Required.

Scanner

(for Professional versions only): Epson Perfection or Canon LIDE scanners. See our Web site for a complete list of preferred scanners.

- Software for all ages
- Text-to-speech conversion
- Supports all blind and visually-impaired readers

Kurzweil 1000™ Version 11 for Windows®

by Kurzweil EDUCATIONAL SYSTEMS®

Kurzweil 1000 is award-winning software that makes printed or electronic text accessible to people who are blind or visually impaired. It incorporates communication and productivity tools to ease and enhance their reading, writing, and learning experience.

The software speaks text aloud in a variety of natural-sounding voices that can be modified to individual preferences. In addition, the software gives users the ability to scan, write, and edit documents, and to complete simple forms independently, as well as features for note taking, summarizing content, and outlining text.

Kurzweil 1000 delivers quick access to virtually any content, including online books, magazines, dictionaries, and encyclopedias, so readers can pursue the interests they want. They can also take their reading wherever they go by sending files to Braille note takers and embossers, and portable devices such as DAISY and MP3 audio players.

Kurzweil 1000 is easy to use for beginners, yet powerful and flexible for advanced users. Its wide array of features will save users time and help them gain independence – whether at home, at school, or at work.

Kurzweil 1000 features:

- Simple form recognition and completion
- Appointment calendar with audible reminders
- Eighteen bi-lingual dictionaries
- Creation of documents and tables
- Online reference and material search with download functions
- Study tools – bookmarks and annotations; skim, summarize, and create outline options
- Creation and playing of audio files (DAISY/MP3)
- Broad range of file type access

IntelliBraille

Grades K to 8

Educational software program for visually-impaired students.

Features:

- Use with *Classroom Suite*®, *Overlay Maker 3*, and *IntelliKeys*® USB from IntelliTools
- 115 activities for Braille and low-vision students
- 16 lessons on the Literary Braille Code
- 70 inkprint overlays ready to be laminated and Braille labeled
- Tutorials
- Windows/Macintosh compatibility

System requirements

Kurzweil 1000 requires a TWAIN or WIA-compatible flat bed scanner, and a computer that meets or exceeds the system requirements listed below:

- Processor: 500 MHz Intel® Pentium® III or faster. If using VoiceText TTS, 700 MHz Pentium II or faster required.
- Memory: 128 MB, 256 MB for VoiceText.
- Hard Disk Space: 500 MB and an additional 625 MB if using VoiceText.
- Sound Card: Sound Blaster® compatible sound card with speakers.
- CD-ROM drive, full-size keyboard and/or 17-button keypad.
- Floppy Disk Drive (for DECTalk® option).
- For Audio File Creation: MP3 encoder and/or media player.
- MP3 File Playback on Other Devices: MP3 player capable of playing multiple sampling rates.
- Operating System: Windows® 98, 2000, ME®, XP®, or Vista® operating systems. (Please note—significant *Kurzweil 1000* features are likely to be unavailable on Windows 98 and Windows ME.)

LANGUAGE!

LANGUAGE!™ The Comprehensive Literacy Curriculum

LANGUAGE! is a comprehensive literacy curriculum that combines phonemic awareness and phonics, word recognition and spelling, fluency, vocabulary and morphology, listening and reading comprehension, grammar and usage, and speaking and writing in an explicit, sequential, and systematic manner for students scoring below the 60th percentile.

Providing multiple entry points, LANGUAGE! places students according to skill level. The LANGUAGE! instructional model weaves all the necessary strands of literacy into the six steps of a daily lesson, accelerating the learning process.

Please call for more information on Kurzweil 3000 or LANGUAGE! or to request a Trial CD or samples of LANGUAGE!

LANGUAGE! eReader Using Kurzweil 3000™

LANGUAGE! eReader Using Kurzweil 3000 motivates students and accelerates learning for all levels of learners. Kurzweil 3000 software reads the LANGUAGE! text selections aloud, while allowing access to all other program functions.

Used with Kurzweil 3000 Professional or LearnStation software, several key benefits of LANGUAGE! eReader Using Kurzweil 3000 include:

Reads LANGUAGE! Text Selections Aloud

- Highlights words as they are read aloud so students gain word recognition and follow along easily
- Models fluency for students
- Provides expanded practice opportunities

Allows Embedded Comprehension Questions in Text

- Engages students in text by asking metacognitive questions at strategic points
- Allows recording of student responses for review
- Fosters good reading habits like predicting and connecting

Reads Internet Content

- Makes content-area research more accessible by reading online material
- Empowers students to access grade-level text
- Motivates students to explore the World Wide Web

Each chapter book in this well-known series focuses on a milestone in American history and addresses the findings of the National Reading Panel in two critical areas of instruction: vocabulary and comprehension. Developed specifically to increase reading comprehension and a love of reading, the series helps bring struggling readers up to grade level and prepare them for high-stakes tests. Books from the *Nonfiction Bookbag* series have been adapted into electronic form for use with *Kurzweil 3000*. The grade level groupings below present both the print and electronic *Kurzweil 3000* editions of these books.

Professional Development Improves Your Success with CLT Products

Kurzweil 3000 • Classroom Suite • Overlay Maker • IntelliKeys • Stages

Cambium Learning Technologies' innovative tools can enhance instruction and help ALL students achieve—but only when used effectively.

Empower your educators by providing the ongoing training and support needed to learn how to integrate CLT products into the classroom for individual, small group and whole class instruction. Our Implementation Services team consists of highly qualified educators with extensive experience in educational technology integration, curriculum, assistive technology, literacy, and universal design.

Plan for Successful Technology Integration:

With appropriate professional development and planning, our Implementation Services team can help you:

- Ensure that all students can achieve
- Integrate technology
- Differentiate instruction
- Supplement and enhance your existing curriculum
- Support the UDL classroom
- Extend teachers' reach
- Meet educational goals
- Build internal capacity
- Enhance instructional strategies
 - Reading
 - Writing
 - Math
 - Study skills
 - Test taking

CLT Professional Development Options:

Designed to meet your needs and your budget!

- Long-term implementation partnerships
 - Training, lessons, consultation support
- Private on-site workshops
- Public regional workshops
- Live online workshops
- Self-study online workshops
- Product knowledge certification
- High stakes test preparation services
- Curriculum alignment services

**Product Training • Mentoring • Classroom Modeling • Consultation
Curriculum Alignment • Ongoing Support**

A Little Expert Guidance Can Make All the Difference Between GOOD and GREAT Results for ALL of Your Students

You've Invested in your Students ... Now See it Pay Off!

Assess

Cambium Learning Assessment System uses curriculum data management, analysis, and reporting to demonstrate student progress and inform instruction.

This assessment system is an online data management and reporting tool that enables educators to effectively use student results to drive instructional decisions, meet reporting requirements, and increase student achievement.

Administrators benefit by:

- Tracking curriculum efficacy
- Pinpointing successes and challenges to highlight implementation fidelity
- Disaggregating data by student subgroup, school, and teacher

Analyze

Teachers, specialists, and coaches benefit by:

- Accessing powerful formative reports to allow early intervention
- Using specific intervention supports to match individual student needs
- Generating customized reports that chart student progress to share with administrators and parents

Parents and students benefit from receiving personalized student progress updates that result in more targeted, successful intervention.

Communicate

To Learn More

For more information on Cambium Learning Assessment System, go to www.sopriswest.com/language and select "Assessment" from the right navigation.

Instruct

The following Cambium Learning Sopris West products are powered by the Cambium Learning Assessment System.

LANGUAGE!

The Comprehensive Literacy Curriculum

LANGUAGE! Online Assessment (LOLA) System

Cambium Learning Assessment System now powers the highly successful *LANGUAGE! Online Assessment (LOLA)* in both the Third and Fourth Edition of the curriculum to:

- Easily place students in one of the multiple entry points and create classes
- Track ongoing and cumulative student progress and generate individualized reports for teaching teams and parents
- Build high-level reports organized by user-selected student subgroup to meet reporting requirements

TRANSMATH™

TransMath Online Assessment (TOLA) System

Cambium Learning Assessment System technology is embedded in the new edition of this powerful mathematics intervention, generating:

- Individualized student placement based on student's mastery of foundational mathematics skills
- Ongoing assessment results that inform instruction and summative results that measure student progress
- Additional resources available to support teachers, specialists, and program evaluators

Coming Soon

DIBELS

DIBELS (Dynamic Indicators of Basic Early Literacy Skills) Online Assessment (DOLA) System

Cambium Learning Assessment System combines with *DIBELS*, the most reliable early literacy assessment in the industry, to:

- Manage student data across the district and review progress over time
- Monitor progress for students falling below proficiency and identify whether an intervention is working
- Generate student-specific reports to inform instruction and share with teaching teams and parents

Technical Support

Please call us or contact us by email at technology@cambiumlearning.com

30-day money back guarantee

All IntelliTools products are backed with a 30-day unconditional money-back guarantee. Kurzweil products may be returned within 30 days provided the shrink wrap has not been broken. Please call and select the customer service option for an authorization number and procedures before returning.

IntelliKeys warranty

IntelliKeys comes with a one-year warranty on materials and workmanship. If you experience problems with your IntelliKeys, call Technical Support. In most cases our Technical Support staff will be able to help you resolve your problem on the phone. When you call, please be seated at your computer with IntelliKeys plugged in and your computer on. If a return is necessary, Technical Support will issue an IntelliKeys Return Number and shipping instructions.

Placing your order

Purchase orders

We accept signed Purchase Orders by fax, e-mail, and mail. We find that e-mail is the most reliable transmission method and encourage you to send your Purchase Order to our Customer Service email address. If you fax or e-mail your order, please do not mail us a copy; otherwise, your order could be duplicated. The Purchase Order must include "Bill To" and "Ship To" addresses and a Purchase Order number. Discrepancies in pricing, taxes, or shipping costs may delay order processing—please check your order carefully. Materials are shipped ground service unless faster service is specified on your order. (See "Rush Delivery" for additional information.) We cannot accept Purchase Orders by phone. Requisitions are not an acceptable alternative to signed Purchase Orders.

Web site orders

Customers may place orders via our Web site 24 hours a day. Please note that if you place an online order using a Purchase Order, you will still need to fax a copy of the Purchase Order and a Certificate of Tax Exemption (if applicable) to (866) 645-5448. Customers placing orders online using their institution's credit card must fax us a copy of their credit card or credit card statement and applicable tax-exempt information.

We accept Visa, Master Card, American Express, and Discover

Tax-exempt status

A Certificate of Tax Exemption must be on file or included with your order. Please mail or fax this with your order; otherwise, order processing may be delayed, or taxes may be applied.

Shipping

If there is a specific date by which you need your materials, please let us know at the time you place your order.

Normal delivery

Our normal order processing time is quite fast; most orders are shipped between 3 and 4 business days from order receipt (October–May). During the summer, orders ship 5–7 business days from order receipt. To receive status updates on your shipment, please be sure to provide your e-mail address when you place your order.

Rush delivery

Rush orders must be received in Customer Service by 11:00 a.m. Mountain Time in order to be shipped that day. Otherwise, they will be shipped the following business day. When placing the order, please specify: Overnight, Second Day, or Third Day shipping.

Order Amount	Ground	Overnight	2 Day Air	3rd Day Select
\$1-\$199	\$7.00	\$32.00	\$18.00	\$13.00
\$200-\$499	\$12.00	\$54.00	\$31.00	\$23.00
\$500-\$999	\$18.00	\$71.00	\$41.00	\$31.00
\$1000 or over	1.50%	6.00%	3.50%	2.50%

Authorized sales representatives and resellers

Check our Web site or call for a US, Canadian, or other international sales representative or reseller in your area. Prices in catalog reflect suggested retail prices. Prices may vary when purchased through an authorized reseller and are subject to change without notice.

Prices

Prices are effective January 1, 2009. All prices are subject to change without notice. Call Customer Service to verify prices and/or request an updated catalog.

International Shipments

Please check our web site for International Partners.

Return policy

If for any reason you wish to return the products you purchased, you must return them within 30 days of receipt for a full credit or refund. To ensure proper credit or refund, you must call Customer Service for an authorization number and procedures before returning an item. Products returned after 30 days will be subject to a 15% restocking fee. Products cannot be returned after 90 days from the date of shipment. Kits, Classroom Sets, etc., must be returned in their entirety. We cannot switch components or issue partial credits. If you find an error on your packing slip, or if your order was filled incorrectly, please notify Customer Service within 10 business days of receipt. We will do our best to rectify any discrepancies promptly.

Return shipping

You are responsible for the cost of return shipping. Returned goods must be shipped via UPS or FedEx. All returned materials must be in salable condition. Please package returns carefully so that they are not damaged in transit, and limit the weight of your boxes to 50 pounds. If we receive damaged goods and you would like them returned to you, you must pay the return shipping costs. Please call and select the customer service option for an authorization number and procedures before returning.
