Kurzweil 3000™ for Windows Features and Benefits

Kurzweil 3000 is reading, writing, and studying software that enables struggling readers in grades 3 and above to learn from the same content as their peers.

Students have difficulty reading for a variety of reasons. Regardless of the reason, because they are unable to read fluently at grade level, they are unable to learn from the content assigned to their class. For these students, *Kurzweil* 3000 can be life changing.

Kurzweil 3000 provides multi-sensory access to virtually any text or curriculum, including print, electronic, and Web-based documents, so students learn from grade-appropriate content, develop valuable study skills, and become independent learners.

Unlike other programs that work only with preformatted material, *Kurzweil 3000* allows teachers the freedom to work with content from any publisher across content areas. In addition, *Kurzweil 3000* supports the principles of Universal Design for Learning (UDL) enabling multiple ways for students of all abilities to engage with digital text. Moreover, *Kurzweil 3000* is used at all tier levels with Response to Intervention (RtI) programs to prevent students' academic performance from slipping.

> If you have an earlier version of *Kurzweil 3000* you can upgrade to *Kurzweil 3000* Version 11 at a discount. Contact us today at: 800-547-6747 to find out more.

The Column Notes feature allows students to take live notes while reading or attending class lectures. Students can also highlight and extract key elements of the text and place them into specific columns.
