#### Introduction

Kurzweil Education is pleased to release the Classic Literature Collection.

The Classic Literature Collection is a portable library of approximately 1,800 electronic texts, selected from public domain material available from Web sites such as www.gutenberg.net. You can easily access the contents from any of Kurzweil Education products: Kurzweil 1000™, Kurzweil 3000™ for the Apple® Macintosh® and Kurzweil 3000 for Microsoft® Windows®. The collection is also available from the Universal Library for Web License users on K3000+firefly.

Some examples of the contents are:

- Literary classics by Jane Austen, Geoffrey Chaucer, Joseph Conrad, Charles Dickens, Fyodor Dostoyevsky, Hermann Hesse, Henry James, William Shakespeare, George Bernard Shaw, Leo Tolstoy and Oscar Wilde.
- Children's classics by L. Frank Baum, Brothers Grimm, Rudyard Kipling, Jack London, and Mark Twain.
- Classic texts from Aristotle and Plato.
- Scientific works such as Einstein's "Relativity: The Special and General Theory."
- Reference materials, including world factbooks, famous speeches, history resources, and United States law.
- Religious texts.

## How the Contents are Organized

The top level of the Collection contains a folder for each letter of the alphabet as well as topic names, such as European History, Religious Texts, and Unknown for anonymous works. Each alphabetic or topic folder holds folders named by author or sub-topic. These folders hold subfolders or text files based on the units, chapters, or other natural division of the material.

The Contents list beginning on page 3 of this guide provides the names of the Authors and Topics, along with the titles contained in those folders.

Note: If you are using the Kurzweil 3000 for the Macintosh, some author, topic or file names presented to you may differ from those listed in this guide (for example, they may be abbreviated).
